

Drawings ! Drawings ! Drawings !

Most drawing & design offices pay a lot of attention to the preparation of drawings. Most drawing & design offices laboriously have their drawings filed and stacked for historical reference. Most drawing & design offices spend a lot of time searching for drawings. Most drawing & design offices labor to try to keep their drawings updated and confirming to 'as built'. Most drawing & design offices dream of a system that will free them of all this. Most drawing & design offices are still looking for an effective way...

Freedom !

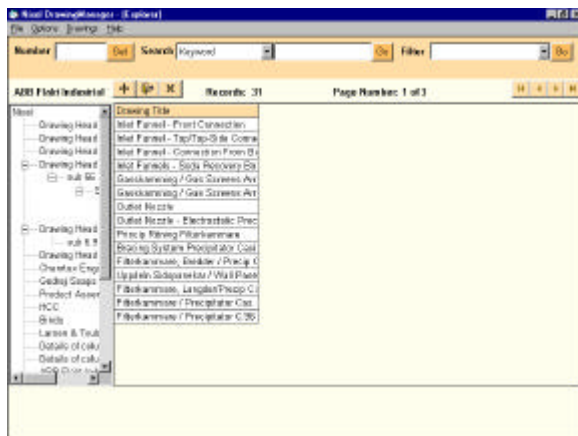

Nixel DrawingManager presents a simple and easy way to organize your drawings and find them when you want to. The software is suitable for small drawing offices and large enterprises that have offices and people at multiple locations that make, revise or refer to drawings all the time as part of their work routine.

The software with a client-server or web architecture provides a secure and easy method to index your drawings, classify them and assign keywords for search. Based on a variety of criteria, users can then browse lists that have been filtered to their specification and find the specific drawing that they need. These drawings can be viewed or edited by industry standard viewers and editors by launching them from the DrawingManager.

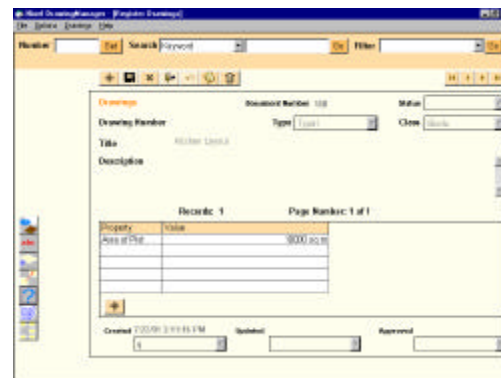

Explore the drawing repository

The Nixel DrawingManager presents an easy and elegant way to manage a large repository of drawings. Drawings can be assigned to various classes. A user can then browse through the drawing repository by going through the various classes in an explorer like interface. Security privileges can be assigned to each class to ensure only an authorized user can access and view these drawings.

Tag data to your drawing index

Drawings are graphical representations and frequently need to have data tagged to them to enable search and recall. Nixel DrawingManager provides for tagging of this data to each drawing that presents a holistic view of the drawing and enables search on any of these data fields. The data structure can be set up to suit varying needs of organizations and classes of drawings.

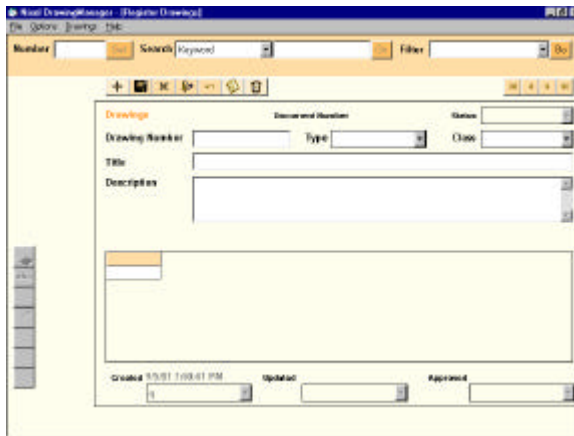

Click & Find

These and a host of features make Nixel DrawingManager simple to use and powerful in its application.

The software can be customized for preferences & standards of individual organizations. A secure database for maintaining this data such as Oracle or Microsoft SQL Server ensures that the large repository of drawing information is managed centrally and is accessible and yet secure.

Drawings are knowledge assets of organizations and need to be managed carefully. Nixel DrawingManager gives you an easy way out.

- Build drawing profiles
- Find quickly & easily
- Automate information update
- Locate drawings simply
- Track drawing progress
- Work across the network & web
- Secure access & edits
- Authorize filtered view access
- Track revisions & issues
- Relate drawings & design objects
- Integrate design workflow
- Manage your drawing & design office better

Quick to install, easy to deploy

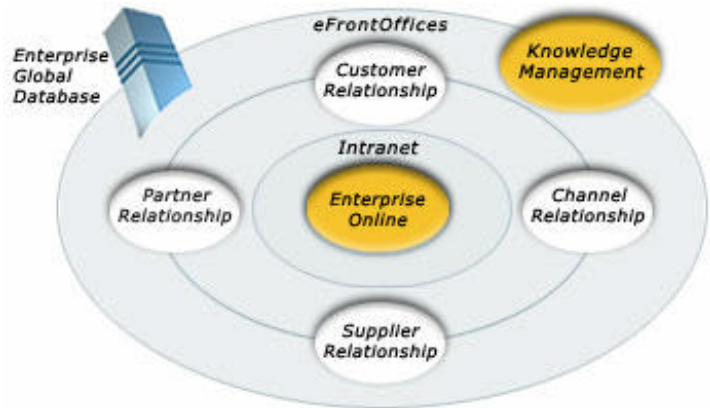

Nixel DrawingManager is equipped with a simple, intuitive user interface that requires little time to understand and navigate through. An easy installation process has the application working off your desktop in minutes.

Legacy data can be converted to the DrawingManager format. Nixel authorized engineers will be happy to help in this process.

Nixel DrawingManager comes with a training program, user and administrator documentation and technology support from Nixel. A dedicated section on our website provides you with information and any downloads that might be needed. Nixel provides web, email and telephonic support to help ensure that DrawingManager is working and delivering to you all the time.
