

Nixel DrawingManager

Develop & exploit your Design-Engineering Knowledge Base

Nixel DrawingManager is a powerful new software tool that can help you cut down your design lead-times, automate workflow in your drawing office, reduce design costs and build a structured knowledge base for your organization. Unlike many other complex enterprise software systems, Nixel DrawingManager is simple and quick to setup and migrate your legacy data. Its intuitive user interface makes it simple to operate with minimal training and skills.

Here are some of the things it can do for you immediately

- Manage all your drawings and documents from a central database that forms a permanent record of the knowledge you have in your organization.
- Help you search through the knowledge base easily based on a number of powerful criteria.
- Find and identify drawings and technical documents quickly and easily.
- Integrate all your users into a single knowledge network.
- Work with all popular document formats including CAD, Text, Graphics, Presentation and others.
- When linked with Nixel PartsManager, provide a powerful method to work with your parts database and bill of materials.
- With the optional AutoCad driver, enable you to update information directly from the AutoCad drawing editor.

Features you can benefit from

- Maintain a record of all drawings available in your engineering-design area.
- List all the available formats in which your documents are available.
- Track revision history of a drawing.
- List organizations and persons associated with each drawing.
- Add keywords that can help identify specific attributes with each drawing and enable easy search.
- Record and track issues of drawings through the electronic issue register.
- List engineering & design properties for each drawing, thereby providing you with a complete engineering record for each drawing and facilitating powerful search options.

Nixel DrawingManager can be setup and made operational in as few as 7 days.

Available in Single User Desktop and Multiple User Network Versions. Network versions start with 5-users and can be scaled up easily. Network versions will need a server with Windows NT / 2000 and MS-SQL Server

- Drawings can be located anywhere on your desktop, network or URL.
- Search through drawings from a wide range of parameters.
- The powerful reports module will provide you with instant reports drawn from your knowledge base.
- The workflow automation feature will help you cut down time in your drawing office and ensure better coordination.
- User access can be selectively provided for enhanced data security.
- A useful import utility can help convert legacy data for use

by Nixel DrawingManager.

- Nixel can assign a team that will enable quick migration of your legacy data for use in Nixel DrawingManager allowing you to be up and running quicker.
